Who We Are

SURE Solutions is the largest privately owned supplier of On-Bus CCTV and Technology Systems in the UK. With over 20 years' experience as a leading specialist in security technology and surveillance systems, we are now one of the most well-regarded manufacturers, suppliers and service providers in the Bus & Coach market.

Our reputation has been built on decades of successful service delivery, low failure rate and most importantly: top quality customer support. We are an established 'On-Bus Systems' provider to major operators including The Go-Ahead Group, supplying and maintaining various technological systems such as Camera Mirror Systems, Passenger Counting Systems and Live Vehicle Tracking along with the CCTV camera and recording equipment.

At SURE Solutions we have spent many years developing a culture of care and responsibility for what we do, while driving innovation and delivering top quality products and service. We believe that through a true passion for what we do, we can ensure confidence and deliver certainty in an industry that requires absolute reliability.

We are SURE. You can be too.

Solutions For Passenger Transport

We have a range of CCTV systems that cater to the transport industry, from smaller operators to some of the largest fleets in the UK.

Our solutions start with the standard range, incorporating an 8ch MDVR, the mid-range with a 12ch Hybrid NVR and our premium range, which is favoured by Tier 1 operators, providing CCTV solutions from 8ch up to systems with 20 full IP channels for London Bus Safety Standard compliance.

The following are examples of some of our standard mid-level and premium solutions. All setups are fully customisable to your specific needs.

Single Decker

SURE View

Full Digital Camera Mirror System

Slim profile cameras fit externally in compact housing and feed live HD footage to two large internal driver's monitors, removing the need for bulky and limited visibility wing-mirrors.

Advantages Over Traditional Mirror System

- Increased field of view
- Improved visibility in extreme weather conditions
- Removal of blind spots
- Blind Spot Detection alerts
- Improved coverage of insurance claims

Features

- Automatic Blind Spot Detection (Dependant on System)
- Wide Dynamic Range Lighting Balance
- High quality Infra-red low light imagery for night driving
- Automatic adjustment of drivers monitors for ambient lighting at night
- Footage recording and compiling with other onbus CCTV capture
- Easily retro fitted
- Internal monitors not subject to issues of fogging or reduced visibility from extreme weather conditions such as rain and snow.

Bridge Alert

Bridge Alert is a low bridge driver warning aid, integrating with Timespace recorders. Audible and visual low bridge warnings are provided via a dashboard mounted device and driver's CCTV monitor. Using the existing GPS device and licensed Bridge ClearTM data, Timespace Bridge Alert is a simple plug and play installation, with free software upgrades.

Low Bridge Alert System includes:

- Driver CCTV Monitor Warning
- Flashing Red LED Warning
- Audible Warning (Sound or Spoken)
- Vehicle Height Setting
- 1st, 2nd & Danger Warning Bridge Distance Setting
- Cancel Audible Warning After 1st Warning
- Green 'Operating' Dashboard LED

Features

Integrated with Timespace V400 & V500 CCTV Recorder	Operation Monitored & Logged By V400 / V500 Recorder (Optionally By LANLink)	Uses GPS Device fitted To V400 / V500 Recorder	Separate Dashboard Mounted warning Device	Bridge Clear™ Licensed data (UK & Ireland)	VCA E11 R10 Approved (Electromagnet Compatibility)	Also Available with VCA E11 R118 Approval (Fire safety / burning Behaviour Of Materials)

SURE Insight

Our advanced system allows you to effortlessly view and playback both live and historic video footage from your mobile phone, tablet, or PC. With full 24/7 access, you have the power to review on-the-scene evidence for police and insurance teams, as well as provide valuable support for driver training when needed.

Online CCTV Management Portal

- Remote Video Download
- Live View of Vehicle CCTV
- Remote Playback of Captured Footage
- Vehicle Tracking, Speed Indicator, Map Location, Geo Fencing

Consolidate the Management of Your Fleet Across All Depots

- View, Download and Manage CCTV Files with Purpose Built Cloud Storage and Online Video Management Software
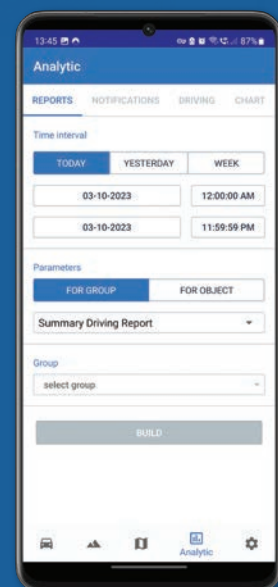

Location Tracking
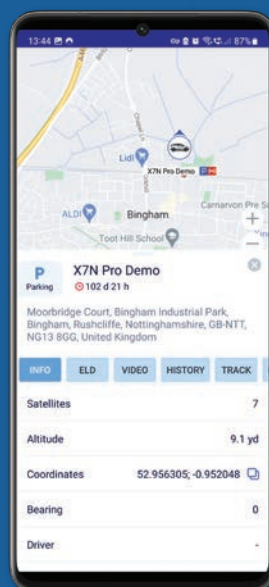

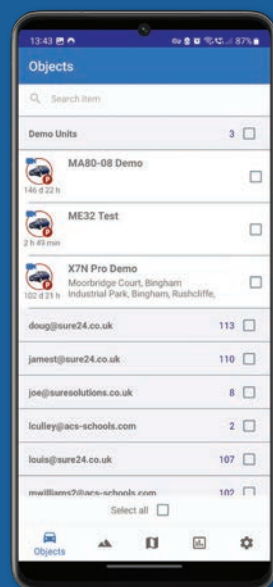

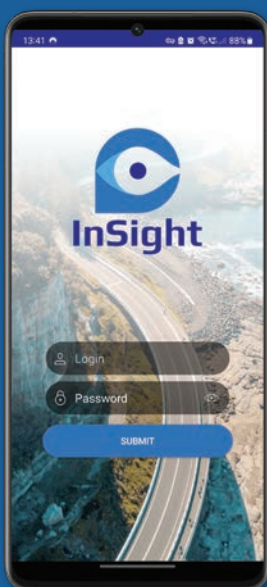

Health Check Homepage

Live View/Remote Playback

SURE Insight App

All the functionality of the desktop software is also available on the award-winning SURE Insight app.

SURE Count
Automatic Passenger Counting System

- Field proven passenger counting with data accuracy of over 99%
- Advanced object recognition to identify and separately count adults, children, bikes, or wheelchairs
- Information recorded and delivered in real time by 4G uplink, allowing active management and decision making
- Feature integration with other external systems, such as Live Passenger Displays, showing next bus occupancy count at bus stops
- Excellent low-light sensitivity and exceptionally low latency

Reporting and Analytics

- Route Capacity Planning
- Live Occupancy Count, including passenger boarding and alighting matched with GPS location and time/date
- Live data push to customer smart app/website
- Bespoke reporting configured to customer spec can include items such as daily count, weekly count, route count, fleet ID, driver, and historic overlay etc.
- Data API available on request

SURE Service

The SURE Service is our hands free, fully managed 24/7 fault identification and rectification service that ensures your CCTV system is always fully operational.

• Fully Managed CCTV Fault and Repair Service
• Daily Reporting on Health of System and Outstanding Defects
• Proactive Fault Identification and Rectification
• Onsite Engineering to Repair and/or Replace any Faults
• Quarterly Maintenance Full Fleet Checks
• All Parts and Labour Included

MONITOR

We continuously monitor the health of the system through our SURE Insight software to instantly identify any faults.

IDENTIFY

We review the fault to determine the nature and severity then report back to confirm the actions we will take to resolve.

RECTIFY

We will then contact you to arrange vehicle availability for a SURE Engineer to visit and carry out the work. All parts and labour are included FREE of CHARGE, except where the fault is due to customer damage or water ingress.

SURE Security

Cyber Security is vital in all business operations. It is the foundation of the trust and confidence our customers place in us, especially when implementing CCTV systems on their vehicles. Recognising the growing threat of cyber-attacks, SURE Solutions has taken proactive steps to protect our customers. We host all customer data on UK servers, directly managed by ourselves. SHARP Electronics provides continuous backup services, ensuring reliability 24 hours a day, all year round.

In addition, we have attained Cyber Essentials Plus approval. This is a UK government-backed cyber security certification scheme that aims to encourage businesses to adopt advanced measures. Achieving this certification underscores our commitment to safeguarding against digital threats.
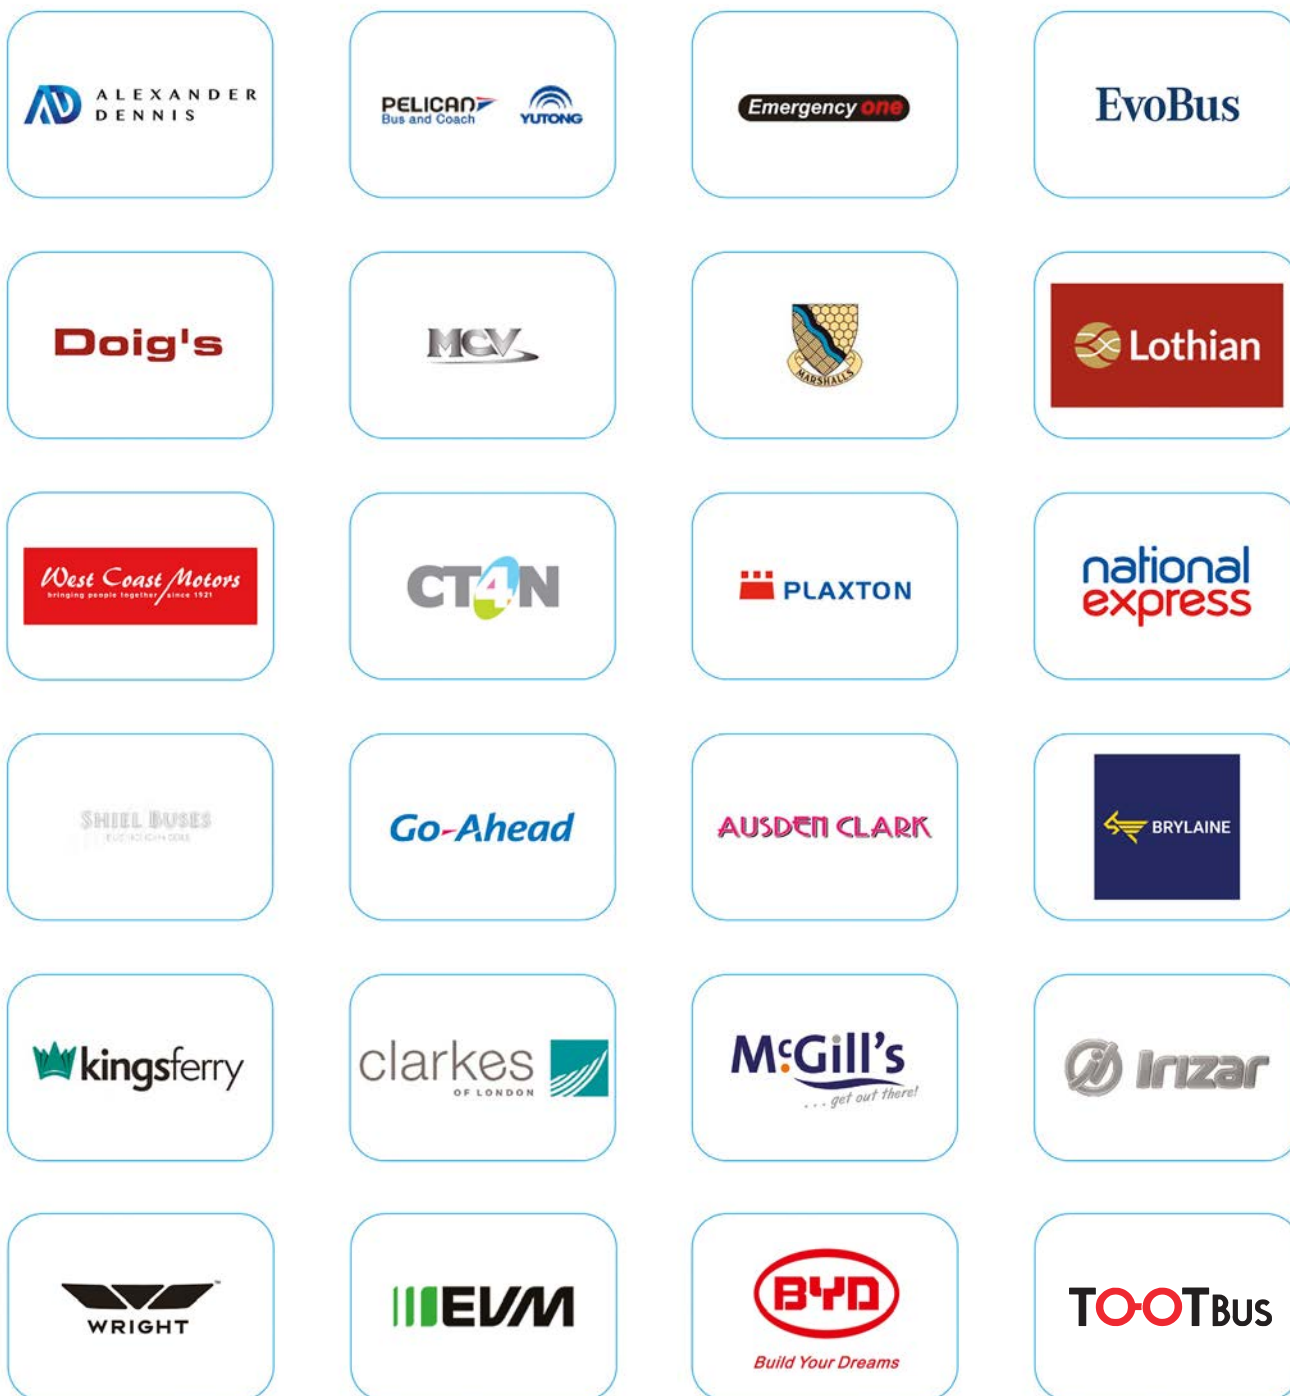

Our journey towards ISO 27001 Certification is also well underway. This certification is an international standard for Information Security Management Systems. It is globally recognised and sets the benchmark for international best practices. With this standard, our policies and operational efficiencies are meticulously documented and reviewed, which ensures clear responsibilities are maintained across the organisation.

In a world where online crime is on the rise, our dedication to staying ahead and protecting our customers remains unwavering. At SURE Solutions, your security is our top priority.

Transport Industry Customers

We supply CCTV across many transport industries. Over the last two decades we have worked with some incredible companies and are extremely proud to say we continue to work with so many of them...
